

PushKey™ Padlock

The Master Lock PushKey™ is a groundbreaking portable lock. Simply insert key – no turning!

The operation of the lock can be achieved by a simple bumping action to the keyhead to both open and close the lock without the need of tight grasping, pinching, or twisting of the wrist.

The large flat keyhead makes the key easy to grip for those with extreme joint pain or with clenched fist dexterity.

The lock is designed to fit most school or hospital lockers.
